DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, and 8-10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by O'Mahoney et al. (O'Mahoney; U.S. Patent No. 5,606,599; cited and applied for the first time).

O'Mahoney plainly teaches the claimed interoperation between a digital network and a PSTN. Refer to FIG 1c of O'Mahoney where it plainly shows a de-vocoder (Voice Compression/Decompression 214) including two output signals combined as a composite signal for deliver within the PSTN.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily

Art Unit: 2642

published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 15-18 and 21-24 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Dalton et al. (Dalton; U.S. Patent No. 6,236,653; cited and applied for the first time).

Dalton plainly teaches the claimed method for formatting data for delivery through a PSTN from a digital network. Refer to column 7, lines 45 – 65 of Dalton.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

Art Unit: 2642

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 3, 4, 11, and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over O'Mahoney as applied above in view of Bodnar et al. (Bodnar; U.S. Patent No. 6,324,176; cited and applied for the first time).

O'Mahoney is silent with respect to signals including PCM samples and digital data bits. However, Bodnar plainly teaches such signal combination in another heterogeneous network. Therefore, it would have been obvious even to one of ordinary skill in the art at the time of the invention to incorporate the PCM samples and digital data bits into the system of O'Mahoney as motivated by Bodnar.

Allowable Subject Matter

9. Claims 5-7, 13, 14, 19, and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
